

CYPRESS COUNTY POLICY

<i>TITLE:</i>	<i>Hamlet Street Lights</i>	<i>POLICY NO:</i>	<i>R 12</i>
<i>AUTHORITY:</i>	<i>Resolution No. 98/38</i>	<i>DATE:</i>	<i>February 3, 1998</i>
<i>REVISED:</i>	<i>Resolution No.</i>	<i>DATE:</i>	

POLICY STATEMENT

The following standards will govern the placing of street lights in hamlets of Cypress County.

1. The standard is one light at every intersection and additional lights not to exceed 500 feet distances between intersections.

For the purpose of interpretation the following examples will guide in determining distances between required street lights. If intersections are for example 600 feet apart, the distance between would be divided by 2 and the additional light would be placed 300 feet apart in that instance. If intersections were more than 1000 feet, say 1200 feet, instead of putting two at 500 feet and then 1 at 200 feet the distance again would be divided equally, with 3 lights at 400 feet intervals.

2. Council reserves the following rights in the administration of this policy:
 - a) To review all requests as to need or funding and their decision will be final.
 - b) To vary the standards and requirements of this policy.
3. Existing hamlet lights will be upgraded to this standard as Council approves through the annual budget appropriations.
